

Certificate in Special & Inclusive Education (CSIE)

Programme Structure

This Certificate in Special & Inclusive Education (CSIE) is a 10-week course, conducted online, face-to-face live-streaming via zoom platform. This is a foundational course for beginners who have no prior knowledge in teaching children with special educational needs (SEN). The course is designed to train participants to gain basic fundamental knowledge and teaching approaches in teaching children with SEN. Participants will be equipped with important fundamentals, pedagogy supported by research findings, easy-to-understand and easy-to-implement classroom strategies in an inclusive or special education classroom.

The course begins with an introduction to special and inclusive education, identification of characteristics of disabilities/SEN, effective practices and behavior management, and the fundamental principles in the inclusive education continuum. Lecture notes, reading materials and teaching videos will be

Objectives

- ✓ Participants will be able to identify the categories of learners with special needs and disabilities
- ✓ Participants will be able to identify effective practices in teaching children with SEN ~ particularly Autism Spectrum Disorder (ASD), Dyslexia, ADD, ADHD, slow learning, Global Developmental Delayed (GDD).
- ✓ Participants will be able to demonstrate basic skills in implementing effective practices in inclusive and special education settings.

Programme Outline

Module 1

Introduction in Special Education

This module studies the services of special education in various countries, its policies, history, challenges and latest development in global and local settings. This module will provide participants with the understanding of disability model, framework in special needs education, the roles of a multidisciplinary team in working with children with SEN.

Module 2

Characteristics of Differently-Abled Learners

This module studies the characteristics, identification, evaluation of disabilities and special educational needs in children. Participants will learn various types of assessments for diagnosis, referral and placement. Participants will gain understanding of assessment tools and curriculum checklists used for holistic intervention planning that covers literacy, numeracy, adaptive living skills, motor skills, interpersonal, language and communication skills.
